

Xpress Management

Elections can be high profile, always time critical and never straight forward. Therefore, it is imperative, especially in an ever increasing technological era, that an electoral administrator has the confidence that their election solution is proven, functionality rich, legislatively compliant but still easy to use... Xpress Management is that solution.

So what does Xpress Management do?

- Runs combined and multiple elections on the same day.
- Understands the concept of combined elections and automatically designates the primary and secondary election.
- Allows you to view a number of election timetables for different polling dates without having to create an election.
- Calculates a range of election timetables from the Notice of Vacancy.
- Automatically checks the validity of nominations against the electoral register.
- Provides a complete range of candidate and agent letters and notices and keeps a complete audit trail of any correspondence sent.
- Produces nomination packs using MSWord®.
- Allows you to add political party emblems.
- Provides a complete range of election notices, ballot papers, envelopes and labels in either English or Welsh.
- Produces election notices and documents in either MSWord® or Crystal Reports® for true flexibility and ease of production.
- Provides you with the facility to produce poll cards in a specific order and format that you require.
- Allows for maps and any additional information to be added to the poll card.
- Allows for the use of drag and drop to enable a fast and effective method of allocating staff.
- Provides a wealth of flexible staffing payment options in order to cater for customer specific needs.
- Allows for staff fees and expenses to be paid via cheque or external systems.
- Allows for payment amounts to be calculated automatically, taking into account combined elections and individual taxation.
- Provides detailed financial transactions allowing for comprehensive reports and the P528.
- Maintains election staff details for those who live in your area by automatically updating their details should they move within your area.
