

## *Xpress NLPG AutoLoad*

The Xpress NLPG AutoLoad software is a solution that automates the uploading of the LLPG change file into the Xpress Register.

### *So what does NLPG AutoLoad do?*

- It allows Xpress Register to be scheduled to run at certain times of the day to automatically process any new DTF files from the pre-defined import folder.
- The Xpress NLPG AutoLoad can be run simultaneously to the Xpress Register running.
- Remove the need to manually import the LLPG change files, a useful tool for those customers whose Gazetteer custodians delivery daily or regular LLPG change files.
