

Xpress Remote Count

As part of our core package, customers also have access to our Xpress Remote Count solution.

So what does Xpress Remote Count do?

- Runs remotely in a non networked count location.
- Handles the recording of ballot paper accounts and ballot verification figures.
- Provides an on screen overview as to the current status of each counting area i.e. verified, count started, declaration printed, and result declared.
- Produces a number of reports and notices in both MSWord® and Crystal® such as Ballot Verification, Declaration as to Result of Poll, Summary of Results, and Turnout etc.
- Provides a result display screen, which includes ward overviews, vacant seats, political balance and in-depth scrolling results screens showing votes cast and percentages.
- Keeps you in full control of your count.
